

Environmental Policy

Desal Supplies recognises that its day to day operations can impact both directly and indirectly on the environment.

The Business will work to integrate environmental considerations into our business decisions and adopt greener alternatives wherever possible, throughout our operations.

To meet these requirements the Business aspires to:

- Observe relevant environmental legislation, statutes, codes of practice and Industry Standards;
- Educate, train and motivate its employees to work in an environmentally responsible manner;
- Reduce water and energy use;
- Establish objectives, targets, effective monitoring, auditing and review of environmental performance;
- Reduce waste by changing working methods and practices to become more efficient and through re-using and re-cycling;
- Involve customers, partners, clients, suppliers and subcontractors in the implementation of our objectives;
- Ensure, where practicable, that our buildings are managed to achieve a good standard of environmental performance;
