+GF+ Signet 2000 Micro Flow Sensor

3-2000.090-1 Rev. 6 01/19

Description

The Signet 2000 Micro Flow Rotor Sensor is constructed of Polyphenylene Sulfide (PPS) which provides high material strength. The 2000 offers two flow ranges starting at 0.11 or 1.13 lpm (0.03 or 0.3 gpm), for clean process liquids, regardless of fluid color or opacity.

This sensor can be connected to flexible tubing or rigid pipe, and uses standard hardware for mounting. Only one moving part and a low pressure drop across the sensor reduces operating costs and maintenance requirements.

Operating Instructions

Features

- Operating range 0.11 to 12.11 lpm (0.03 to 3.2 U.S. gpm)
- Simple mounting
- 1/4 in. NPT or ISO threads for simple pipe or tubing connection
- · Measures opaque and transparent liquids
- Low pressure drop
- Standard cable 7.6 m (25 ft)

Warranty Information

Refer to your local Georg Fischer Sales office for the most current warranty statement.

All warranty and non-warranty repairs being returned must include a fully completed Service Form and goods must be returned to your local GF Sales office or distributor. Product returned without a Service Form may not be warranty replaced or repaired.

Signet products with limited shelf-life (e.g. pH, ORP, chlorine electrodes, calibration solutions; e.g. pH buffers, turbidity standards or other solutions) are warranted out of box but not warranted against any damage, due to process or application failures (e.g. high temperature, chemical poisoning, dry-out) or mishandling (e.g. broken glass, damaged membrane, freezing and/or extreme temperatures).

Product Registration

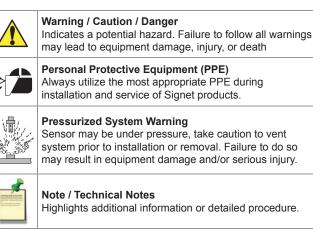

Thank you for purchasing the Signet line of Georg Fischer measurement products.

If you would like to register your product(s), you can now register online in one of the following ways:

- Visit our website www.gfsignet.com and click on Product Registration Form
- If this is a pdf manual (digital copy), <u>click here</u>

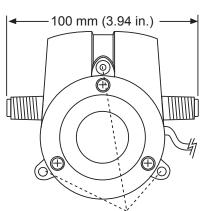

Safety Information

- 1. Depressurize and vent system prior to installation/removal.
- Confirm chemical compatibility before use.
 Do not exceed maximum temperature/pressure
- specifications.
- Wear safety goggles or faceshield during installation/ service.
- 5. Do not alter product construction.

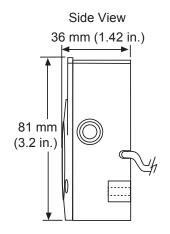

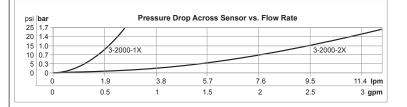

Dimensions

Sensor Mount Instructions

Remove sensor then use correct screws for panel material.

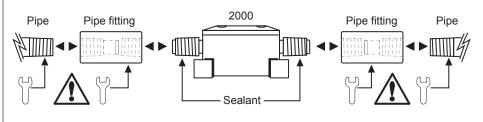

Fitting Installation

CAUTION:

- Maximum pipe fitting torque: 13 Nm (10 lb)
 - DO NOT overtighten. Failure to observe torque specification may permanently damage sensor ports.

Technical Notes:

- Compatible fittings (customer supplied): Female union (shown), reducer, or hose barb type.
- Always apply thread sealant to sensor port threads to prevent leakage.

K-Factors

The K-Factors listed below represent the number of pulses the sensor will generate for each engineering unit of fluid which passes. They are listed in U.S. gallons, liters and ml by sensor model:
